

Cinderella By Steven Curtis Chapman...

“Its A Date” 09'

Parents: Eddie and April Gibson

Student: Tierra Gibson

The reason I picked Cinderella, which was the daddy & daughter dance, was because it really impacted me. The song with the dance was amazing. It shows the relationship between a daughter and her father. The way it shows it is that the a father loves the daughter as much, NO, much more than the daughter loves him back. The song explains how much the dad misses his little girl being little. Even when she grows up she will always be his little girl. He hopes she know that she can always come back to her daddy when she needs him. The father misses his daughter when she moves away from home and gets married. But the father will always know that she WILL come back when she needs him. Yes, some girls may have lost their daddy and don't have one but there is always a grandpa or uncle. Anything that is father figure. It goes the same thing for them. They love them so much. Even though they can't replace their daddy but they do have that love. The way it also makes it my favorite is that it also reminds me of the relationship I have with my daddy. My daddy and I have a strong relationship. He loves me very very much. My daddy and I love each other so much. My daddy always reminds me that he loves me by asking me if I know that he loves me. The second reason I picked the song is because it also talks about the relationship between each other. Then the dance was great too. The way the choreography was amazing the way you did it with the words. Where it's talking about the daughter growing up and moving away how you made them walk away. That was amazing! Another reason I picked that it is that it impacted me by a lot. Because it reminds me with my daddy. Just think of all the memories you went through with your daddy. All the happy and joyful times you had with him. Yeah, some of you might not have had dads that were always there. But you either might have had an uncle or a grandfather. Maybe even a

mother to have those memories with. Also the song reminds me that my daddy loves me so much. And that when I grow up and might move away the he will miss me as much as I will miss him. Also another reason I picked it because is because the song. The meaning of the song is amazing. I was researching about it and I thought I was sooo cute. Steven Curtis Chapman said that he wrote it one night after he was giving two of his girls a bath. It was getting late and he was getting a little aggravated with them because they would get out of the tub and put on their princess outfit and dance around asking him if he would take them to the ball. And it doesn't help when he was in a hurry. As soon as all of the chaos was over and he put the girls to bed he went back to writing songs. Soon he remembered having memories with his oldest daughter that was 21 at that time. Thinking that now he knows that time goes fast and he needs to cherish every moment he has with his little girls. A tragedy happened in 2008. He lost his youngest daughter Maria. They had adopted Maria. One of their sons had accidentally hit Maria while he was pulling into their drive- way. So I bet that that song Cinderella means a lot to him. That is also another reason I picked that. The reason I also wrote about this song and dance is that it reminds us all that we need to cherish every moment . That we have with our dads and that we need to remember even sometimes when he grounds us he does it cause he loves us. Also I liked it because the song talks about how she still needs her daddy no matter how old she is . Please remember that no matter how old you are you still can go to your dad and if you don't have a dad you can go to your mom. I hope you guys enjoyed reading this as much as I did writing it. Thank you so much for taking time to read this for me to get a chance to get a free year of dance class. That is the reasons I picked Cinderlla By Steven Curtis Chapman, Dance recital "Its a Date" 09' Daddy & Daughter Dance. Again thanks you sooooo much for reading my report.
